

MULTIPAK™ GIFT CARDS

Multiple Gift Cards in One Transaction!

MultiPak™ packages several gift cards in a single, secure and attractive package allowing your customers to purchase several gift cards with a single POS transaction.

MultiPak™ is available for barcode or mag stripe activated cards. Cards are bundled in sets of 3, 5 or 8 or 10, although other quantities are available upon request. Paks are affixed in easy open, yet secure packaging that displays the card artwork. Several packaging options are available, including blistered and our unique skin packaging.

Our skin application is crystal clean in presentation with virtually no glue adhesion points on the surface of the carrier. The film is recycled and flexible throughout the product's life cycle. It bonds to the paper and ensures a secure and tamper-evident package.

MultiPak™ offers both a stacked format, showing only the top card in the bundle, or a display format. The display format staggers the cards showing all, or a portion, of each card in the pak. Both formats are processed using InTech Direct's triple scan verification process ensuring accuracy within each pak.

MultiPak™ provides a great solution for party group purchases, small organizational needs, local charities, and small business cash management, just to name a few.
